3:15 pm - 4:00 pm PT - Symposium hosted by TELUS Health
How digital enablement supports citizens across the continuum of care
This session will explore how digital technologies have supported citizens across the continuum of care, by strengthening continuity of care, providing additional supports remotely and empowering patients by putting health information into their own hands. The session will cover how the implementation of digital technologies has improved access to care, reduced barriers, and strengthened outcomes for patients, by equipping them with the information and education to better self-manage their health and wellness regardless of where they are on the continuum. ...
