Build Canadian digital health and health informatics competency with certificates and courses from Digital Health Canada

Health informatics and digital health professionals across Canada have been learning with Digital Health Canada since 1975. Together, the certificates and Core Health Informatics modules provide a deep understanding of the Canadian healthcare system and the critical topics underlying health informatics and Certified Professional in Healthcare Information and Management Systems – Canada (CPHIMS-CA).

Group Learning Bundles

Group Learning brings together organization stakeholders who may not know one another, fostering collaboration and collegiality in the context of IM/IT education. New learners acquire skills and knowledge while experienced team members benefit from a health informatics knowledge refresher. Group Learning is a great way to bring new team members up to speed on health informatics core competencies—all at the same time.

Our Group Learning Bundles include seven Health Informatics modules that align with most semester-based courses; two light-lift certificates on topics relevant to the industry; and Resource Guide to Digital Health in Canada textbook (digital and hardcopy available).

Digital Health Canada offers:
- A variety of Group Learning Bundles to choose from
- Unique login to the LMS for each learner
- Automatically generated Certificate of Completion
- Full technical support for each learner

Topics
- Virtual Care Certificate
- Enterprise Innovation Certificate
- Core Health Informatics:
  » Module 1: The Canadian Healthcare System
  » Module 2: Clinical and Health Services
  » Module 3: Information Management
  » Module 4: Information Technology (Technology Ecosystem)
  » Module 5: Analysis and Evaluation
  » Module 6: Project Management
  » Module 7: Organizational and Behavioural Management (Healthcare Transformation)

Contact **education@digitalhealthcanada.com** to ask about Group Learning Bundles.

The Core Health Informatics (Core HI) course offered through Digital Health Canada has helped to elevate my professional skills. I can better collaborate with colleagues at my organization, as well as provide valuable input to implementation projects that involve multiple stakeholders. Some of the units reinforced previous learning I have done in my Bachelor of Health Studies and health professional designations, while other units covered brand new topics I had never learned before.

KAITLYN HEBERT, B.H.ST., RDH, VP PRIVACY & SAFETY, LUMECA HEALTH INC.

Group Learning Bundles offer value for private and public sector organizations and academic institutions

Value for healthcare organizations

Reduce staff on-boarding and training time by educating teams on the basic principles of Canadian digital health with a fast and proven methodology and standardized, industry content. Improve digital health and digital transformation literacy and create a common language and learning approach for clinical, operational, and technology staff and departments. Offer easy-to-access continuing education options with approved digital health content as an employment benefit, with minimal staff time investment.

Value for private sector organizations

Bring new hires up to speed on the Canadian digital health landscape and deepen their understanding of healthcare system stakeholder organizations with our proven course methodology and standardized content. Group Learning is where you can discuss and align go-to-market messaging using a common language and knowledge base. Your team will gain a better understanding of clinical, operational, and technology staff and departments in buyer organizations—with minimal staff time investment. Plus, offering easy-to-access continuing education is an attractive employment benefit.

Value for colleges and universities

Slash faculty prep-time and set your students up for success by offering courses that align to professional association credentialing and meet the needs of hiring organizations in both the public and private sectors. Group Learning Bundles include validated digital health-related content developed by leading professionals and aligned to professional association credentialing (available post-graduation).

Increase the value of your internal workshops or seminars. Workshop CEP status includes:

- Your logo with a link to the URL of your choice featured at digitalhealthcanada.com
- Approval to use the Digital Health Canada Continuing Education Provider image on your content or website

MEMBER
$750

NON-MEMBER
$950

All price in Canadian dollars. Applicable taxes not included.

Custom Education

Custom Education brings together organization stakeholders who may not know one another, fostering collaboration and collegiality in the context of IM/IT education. Courses are delivered virtually, and modules can be tailored to your training requirements, to fill specific knowledge gaps—ideal for unique team education needs that require a focus on select content. Training as a group is helpful for acquiring new skills and knowledge, or for experienced employees who would like a health informatics knowledge refresher. A group course is also a great way to bring new team members up to speed on health informatics core competencies—all at the same time.

What to expect if you sign up for Custom Education:

- Discounted registration fees
- Unique login to the LMS for each employee
- Quarterly reports to managers on team completion rates (these keep everyone on track to complete the course within a selected time frame)
- Automatically generated Certificate of Completion
- Full technical support for each learner

Contact **education@digitalhealthcanada.com** for more information or to ask about custom options.

Content Hosting

Need a space to host your content? Training for new hires without the overhead of investing in a Learning Management System? Contact **education@digitalhealthcanada.com** for a customized content hosting solution.

About Digital Health Canada

Digital Health Canada is a member-supported not-for-profit professional association that connects, inspires, and empowers the digital health professionals creating the future of health in Canada.

Our members are a diverse community of accomplished, influential professionals working to make a difference in advancing healthcare through information, technology, and data management.

Digital Health Canada fosters network growth and connection; brings together ideas from multiple segments for incubation and advocacy; supports members through professional development at the individual and organizational level; and advocates for the Canadian digital health industry.

GOALS

- **Excellence for Members –** growing and empowering our membership and empowering through tools and relationships;
- **Acting for Equity –** supporting our membership and advancing our network with equity, diversity and inclusion; and
- **Leadership for Industry –** distinguishing Digital Health Canada as a knowledge authority and enabler of innovation in the digital health industry.

VISION

Digitally connected and accessible healthcare for all.

MISSION

Connect, empower, and inspire those enabling digital healthcare in Canada.

VALUES

- **Service:** We serve our members by anticipating and responding to their changing needs.
- **Integrity:** We are values aligned in our approach to relationship building and decision making.
- **Innovation:** We bring awareness to and advocate for new innovations that challenge the status quo and support new models and methods to enhance healthcare.
- **Belonging:** We actively and equitably create a sense of belonging for the diverse professional and personal identities in our membership.
- **Continuous Learning:** We are committed to continuous learning to improve outcomes for our organization and members.
- **Collaboration:** We work intentionally alongside our members and strategic partners to advance common goals.
