enovacom

How AI can help physicians process 64M data points per second

Challenges and opportunities

→ Human brain processing limitations

→ Med Device data proliferation

→ Opportunities

    → Research

    → Clinical operations

Solution implemented and impact

→ Med Device integration

→ High Frequency physiological data

→ Clean and clinically validated algorithms

→ Collaboration with other teaching hospitals

Benefits and what's next

→ Ai-enabled CDSS

→ Improved patient quality of care

→ Improved provider satisfaction

→ Proven feasibility of AI at scale
